SOFTWARE DEVELOPER

Nashville
Tennessee

01. Experience

APPRENTICE SOFTWARE DEVELOPER Nashville Software School | May 2016 - Present

Full-time software bootcamp focusing on modern full-stack development. Utilizing a range of technologies, and skills, both solo, and in team environments; designed, developed, and created software solutions with industry best-practices.

- Version control with Git
- Create static web pages with HTML, CSS, & JavaScript
- SPAs built with jQuery, IIFEs, and modular design pattern
- Rich apps built with frameworks such as Angular and React, databases such as Mongo and Postgres, and third party APIs
- CLI and database-driven apps, custom RESTful APIs, and Websockets, with a focus on modularity built on NodeJS
- Solid foundation in Object-Oriented, and Functional programming
- Unit/integration testing with Jasmine/Mocha

SOUS / INTERIM EXECUTIVE CHEF Noelle Restaurant | May 2013 - May 2015

Lead team to plan, prepare, and execute food to specifications. Created weekly specials to meet customer satisfaction. Maintained inventory, and ordering for all perishable and non perishables, planned schedules for back of house staff, and worked to lower food cost by 20% while maintaining superior quality.
